

Corporate Environmental Policy

Aircraft Technologies Inc. (the Corporation) recognizes the importance of integrating, as effectively as possible, protection of the environment in the management of its activities and intends to deploy constant efforts, in a spirit of continuous improvement, in order to promote this principle among its employees and suppliers.

The Corporation is concerned with protecting the environment for the benefit of present and future generations and commits to comply with applicable laws and regulations. The Corporation also commits to take the necessary measures to mitigate the effects of its manufacturing activities on the environment taking into account the technological and economic viability of these measures.

Therefore, the Corporation adopts the necessary measures to prevent pollution, to conserve and use rationally the natural resources required for its operations and to recycle its residues.

The Corporation commits to adopt guidelines, standards and contingency measures in order to ensure the safe and ecological management of its activities, hazardous materials and wastes.

The Corporation will distribute the present policy to all its management and its employees and will provide appropriate environmental training tailored to their specific needs.

The activities of the Corporation shall be subject to periodic environmental audits.
